### FEATURED SPECIAL

#### LTM Concrete CP520-075 3/4" Coil Protector (Carton of 225)

For years the concrete industry has been forced to use a coil protector with a failure rate near 50%. Don't waste any more time drilling out the remnants of a weaker part - our coil protector is composed of extra-tough polymers and is better engineered than the competition. LTM's coil protector has been successful in over 1000 field tests without failing once. (Carton of 225)

Was \$463.50  
Now \$430.50

# REBAR TOOLS

## Benner-Newman DBC-16H #5 (5/8") Rebar Cutter/Bender

Price: ~~\$3,404.49~~

New: \$2,791.00

Quantity: 1

ADD TO CART >>>

Here's another innovative & quality tool from Benner-Newman and DIAMOND. This portable combination rebar cutter and bender provides jobsite cutting and bending of rebar (reinforcing steel) all in one tool. The unique design of this combination unit provides the operator the ability to cut and bend rebar for in-place rebar or stationary fabrication applications. Now you have the ability to cut and bend rebar protruding from a wall or column or just fabricate what you need on a table. Our powerful electric/hydraulic design is for heavy-duty #5 (1.6 mm) grade 60 rebar cutting and bending. Our competitors' electric/mechanical design is a medium-duty tool. So, our in-place rebar ability and heavy-duty rating are features our competition can not match. It's fast and easy to use, there is no changing of attachments, bends rebar up to 180 degrees. This tool was built with the quality & reliability you would expect from Benner-Newman and DIAMOND. Included with this tool are a steel carrying case, tool kit, hydraulic oil, operations manual, and a one year parts and labor warranty.
