

STRAIGHT FLUSH SAW™

THE CIRCULAR SAW REINVENTED

ZERO

Clearance flush cut capability

31.5%

Deeper depth of cut*

11.3%

Greater torque for faster and cleaner cuts

* Average depth on 7-1/4" saws

○ Construction Ready

The Straight Flush Saw introduces the highest professional standards ever seen in a hand-held circular saw. From quality materials like our lightweight magnesium body to a powerful motor, these saw features have been designed to solve real-world construction cutting needs.

○ Cuts You've Dreamed Of

Owning a Straight Flush Saw puts one powerful circular saw in your hands, but it's the additional cuts that make this tool so unique.

- Cuts stacked 2x4's in single pass
- Plunge cut through 2x4 board
- Twist the Handle to undercut
- Max bevel cut : 65 degrees
- most versatile bevel in industry
- Min bevel cut : -5 degrees
- protects wall board in flush cuts

○ Versatility and Functionality

The Straight Flush Saw was designed to be more versatile than these other cutting tools on the jobsite and will always be within arms reach.

- Circular Saw
- Undercut Saw
- Reciprocating Saw
- Worm Drive Saw
- Metal Saw
- Router

○ Think Efficient

Construction industry leaders favorably received The Straight Flush Saw during our extensive field testing period not only for the ruggedness of the product and safety features, but for the cost savings the tool delivers.

Boasting faster cut times than with a single cut saw, while also reducing material waste - using the The Straight Flush Saw is a slam dunk.

The basic design of the circular saw hasn't changed in over 90 years. Until now.

Specs

Dimensions: 20-1/2"L x 5-11/16"W – 13"H
Weight: 14.3 lbs.
Motor Specs: 115V, 4940 rpm
Torque: 99.2 in lbs

Accessories: 8-1/2" Blades

The Straight Flush Saw features a recessed arbor system designed to allow zero clearance cuts.

Guaranteed for Life

The Straight Flush Saw has a lifetime warranty that covers the manufactured parts or design flaws – even if you're not the original owner.

As the construction industry continues to innovate, the design of the hand-held circular saw has not changed since first introduced in 1927. Jake Cuzdey, a former contractor, has redesigned the hand-held saw with his patented Straight Flush Saw.
