

Products | Rebar Supports | Exposed Aggregate Chairs

Lawrence Tool & Molding is a family business specializing in complex plastic injection molds and precision tooling headquartered in beautiful Denver, Colorado. Owned by a veteran with more than 30 years of professional experience, LTM has earned a reputation for delivering superior products.

Exposed Aggregate (EA) Chairs are used to support rebar or mesh in exposed aggregate and sand-blasted concrete.

- Fine points at leg base insure minimal visibility in the surface of your final product
- Durable, lightweight, non-corrosive polypropylene construction.
